

Aerial Lift Train the Trainer Vernon

Aerial Lift Train the Trainer Vernon - The train the trainer program intended for aerial lifts helps to teach the trainers how to safely train potential operators in an industrial situation. Trainers would be given in-depth instruction on the workings of aerial lift equipment. The program is provided on an open enrollment basis and delivered at select training places. Before the certification, trainers are assessed and scored based on their knowledge and demonstrated skills.

The Aerial Lifts Train the Trainer Certification Program focuses on practical learning and as the best training provider within the business, we offer top notch hands-on training. We give plenty of chances to practice the concepts and techniques which are taught inside the classroom. In addition to hands-on experience, trainers develop general understanding of machine theory and instructional methods, field and classroom communication skills, and ability to efficiently train and assess operators. Trainers will gain knowledge of what traits make an effective trainer.

The Aerial Lifts Train the Trainer Program also teaches the proper methods required to express the right information in the classroom and field setting. There are three aspects of machinery operation that the trainer should learn how to convey to operators: what to carry out; how to do it; and why it must be carried out.

In the program, trainers will be given the latest, detailed reference material to better help them convey the information to machine operators. The instruction manuals used, contain detailed information about all aspects of industrial mobile equipment operator training. Incorporated within the package are training aids which provide a visual reference so as to improve the learning experience. The equipment-specific training products include important materials for both the operator and the trainer: videos/DVD's, overhead transparencies, safety message posters, equipment models; digital training aids and stability pyramid.
