

## Order Picker License Vernon

Order Picker License Vernon - Order preparation operation or order picking as it is more usually known is a method utilized in warehouse operations and comprises workers known as order pickers. The order picker's job is to take and collect articles in certain quantities to complete the client's orders before shipment. Order picking is an easy warehousing method. The efficiency in which this task is completed can be directly related to a supply chain's productivity. Hence, order picking is amongst the most controlled logistic methods. Order picking falls within the category of the warehouse management system.

There are some specific types of order picking. The main kinds comprise: wave picking method, pick to box method, picker to part method or piece picking, zone picking method and sorting systems method.

The pick to box method consists of the order picker filling the box with the things from his or her station. The box then moves to the other picking stations until the customer order is finish. In this particular process, there is no movement of the order picker workers. In the wave picking method, the order pickers move around to be able to gather the required products for some orders. The piece picking or picker to part method is similar where the order pickers or picker move so as to gather the stuff required but for one order only.

In the sorting systems method, there is no movement of the order picking staff. Instead, the products are brought to him or her by means of an automated system like for instance a conveyor system or an automatic storage. In the zone picking method, each order picker is assigned to one particular area. They are responsible for only realizing order picking in this specified area.
