Clark Forklift

Performing worldwide, there are at this time 350,000 Clark forklifts and lift trucks in operation, with in excess of 250,000 of those in service in North America. Clark has five major lines of forklifts across the globe, making it one of the most expansive companies in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, duel fuel, gasoline, LPG, hand-driven lift trucks, narrowaisle stackers and electric riders are a few of their specialties.

Clark Totalift has 20 distinctive makes of lift trucks, with components covering more than 120,000 specialized components for all of its automated equipment. Your local Clark Supplier is your total source for availability of all your parts requirements supplied by Clark Totalift.

Clark's phenomenal Parts Distribution Facilities are conveniently situated in Louisville, Kentucky, which serves both their clients and sellers in North America, and Changwon, South Korea, which handles their Asian dealers and customers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing producers. Motivated to offer the highest level of value and service to our users, Clark remains on the cutting edge when it comes to improving productivity and benefiting performance.

Clark Totalift has a very impressive global support network. With over 550 locations globally, dealer representation in over 80 nations and 230 locations in North America, their high level of dedication to their clients predominates the material handling industry.

Clark proudly remains an innovative leader of the industrial equipment industry, revolutionizing safety features such as the operator restraint system. This exceptional commitment to safety is at this time a standard feature on every forklift.

Clark has a continual goal to possess the No. 1 quality system in the industry which is demonstrated by their commitment to ISO standards. Clark, is the first manufacturer of forklifts and lift trucks to be globally certified with quality standard ISO 9001 in all of its manufacturing facilities. Furthermore, the ISO 14001 Environmental Stewardship System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be prepared for any number of environmental limitations, thus placing them in a dominant market position.

Lean Manufacturing

Clark has chosen the very economical and beneficial structure of "Lean Manufacturing" for its assembly plants and application of resources. This structure was developed to acknowledge the most efficient method of production facility stewardship and ensuring maximum proficiency. Clark has completed this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and production efficiencies.

Engineering

By working together, Clark's product suppliers and engineers communicate towards improving product efficiency while minimizing expenses. The new value engineering program combines modern product growth and delivers improved consumer support and service within the industry.
